

## **STREET SWEEPING**

The Brewer Public Works Department will begin our spring routine of sweeping city streets and sidewalks. The amount of sweeping accomplished in any given time during the month of April is dictated by the weather. If the temperature is below or at freezing we can not use the water system on the street sweeper which is the means of dust control therefore we can not sweep in the interest of public health. Please keep in mind the city only has but one street sweeper and 190+ streets to sweep so please be patient. On residential streets we intend to clear just the travel lanes for now to keep the dust down caused by every day traffic. This process will allow us to fairly cover more streets earlier after which we will go back over each street to finish sweeping.

We do keep track of which streets have been swept but sometimes we may inadvertently miss an area, if by the beginning of May a resident believes the sweeper has not visited their street at least once please contact the Brewer Public Works Department @ (989-7800). Thank you for your patience.
